

# Rejuvenate and Tighten Your Skin

Focus Dual combines two powerful skin technologies - Radiofrequency Microneedling (RF) and High-Intensity Focused Ultrasound (HIFU) - to lift, firm and tighten the skin from within. By targeting every layer of the skin, this advanced treatment helps you reach your skin goals with minimal downtime.

- Skin lifting, firming and tightening
- Smooths uneven skin tone and texture
- Treat acne and surgical scars
- Fat reduction and body sculpting
- Tighten sagging and crepey skin
- Wrinkle reduction
- Reduce stretch marks
- Shrink large pores
- Brightens dull skin

# Why Choose Focus Dual?

Focus Dual delivers two clinically proven technologies to maximise skin rejuvenation and tightening.

**RF Microneedling:** Ultra-fine needles deliver radiofrequency energy into the skin, stimulating collagen and elastin. This helps to tighten the skin while improving texture, reducing wrinkles and scars.

**HIFU:** HIFU targets deeper layers in the skin to lift, firm and sculpt the face and body. By heating the tissue, it triggers a natural regenerative response, creating a more defined, youthful appearance.

## 2 Technologies Combined

Using both technologies, Focus Dual treats every skin layer, providing enhanced collagen stimulation, multi-depth skin tightening and long-lasting rejuvenation for the face and body.

Results you'll love,  
by scientists you trust.

## FAQ's

**Q: What makes Focus Dual unique?**

**A:** Focus Dual combines two advanced technologies (RF microneedling and HIFU) in one device. Unlike traditional microneedling, it uses radiofrequency to enhance collagen stimulation. Adjustable settings allow for tailored treatments, making it a versatile option for various skin concerns.

**Q: Am I suitable for Focus Dual treatments?**

**A:** Focus Dual is suitable for most skin types, particularly those with loose skin, wrinkles, acne scars or uneven texture. Our team will assess your skin in a consultation to determine the best treatment plan.

**Q: When will I see results?**

**A:** Many clients notice firmer, smoother skin after the first session, with full results developing over the next 12 weeks as collagen rebuilds. A course of treatments may be recommended for optimal outcomes.

**Q: Does the treatment hurt?**

**A:** Focus Dual is well-tolerated. Some clients report a warm sensation or mild tingling during treatment, but discomfort is minimal.

**Q: Is there any downtime?**

**A:** Downtime is minimal. You may experience slight redness or swelling, which typically subsides within a few hours.
